PROFILE

Dynamic and detail-oriented trainee with extensive experience in front-end and back-end development, gained through participation in the Industrial attachment program at ITBI-Diligit. Demonstrates strong technical communication skills and proficiency in tools such as Figma and AutoCAD. Proven ability to collaborate effectively within teams, manage client interactions, and deliver high-quality results under pressure. Career goal includes advancing expertise in full-stack development while contributing to innovative projects within the tech industry.

WORK EXPERIENCE

- **Industrial attachment program 2025 | ITBI-Diligit**

2025 - Present

The session covers the essentials of building websites, from the user-facing interface to the background functionality. The content is typically broken down into three main categories: front-end, back-end, and full-stack development.

- **Industry Academia Collaboration-ICISSET_2025**

2024

the International Conference on Innovations in Science, Engineering and Technology (ICISSET) sessions provide a platform for researchers to present their latest findings across various disciplines.

- **Game-X 1.0 Workshop Session**

2022 - 2023

The workshops focused on providing emerging gaming companies with the resources and knowledge needed to succeed.
